SUMMARY

Software developer (BSc, MSc) with hands-on industry experience in .NET and other Microsoft technologies. Passion for developing innovative software that expedite the efficiency and effectiveness of organizational success.

EXPERIENCE

03/2023 – Present
Software Developer, Epsilon SingularLogic

- Contribute to the development of a new ERP system designed for small and medium-sized businesses
- Leverage cutting-edge technologies to deliver a robust, scalable, and interactive web application
- Close collaboration with cross-functional team members, including analysts, testers, and developers, to ensure a seamless product development cycle

09/2020 – 02/2023
Software Developer, Noon Informatics S.A. / Alpha Bank

- Participate and contribute in all phases of the project (Wealth Management System) delivery lifecycle (business analysis, design, development, testing and deployment) and ensure quality standards are adhered to
- Assist in user acceptance tests by creating/enriching test cases to support project implementation
- Understand business requirements and translate them into technical requirements
- Collaborate with multiple teams (software developers, business analysts, system/database administrators)

05/2018 – 11/2018
Software Developer, Trade One P.C. (internship)

- Upgrade and maintain existing custom e-commerce software
- Integrate software components and third-party systems
- Troubleshot and resolve web application issues

EDUCATION

- 09/2019 – 01/2021
  Master of Science – Computer Science and Engineering, University of West Attica (GPA: 9.6/10)

- 09/2011 – 05/2018
  Bachelor's degree – Informatics and Computer Engineering, Technological Educational Institute (T.E.I.) of Athens
